

Textile Clusters for Industrial Modernisation

Do you want to take a step towards Industrial Modernisation?

Tex4IM, the European long-term partnership for Industrial Modernisation of the Textile and Clothing sector, in cooperation with the European Enterprise Network (EEN), brings together the main European textile-based clusters with the aim of setting up new co-operations for the future of European Textile-clothing sector.

Stockholm, November 13-14, 2019

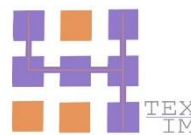

Textile Challenge 3 Material and Chemistry

International Textile-Clothing Matchmaking

TEXTILE & FASHION 2030

Presentations by Sandra Roos and Ellinor Niit, among others, as well as good examples from the industry.

Detailed programme and registration form for the TEXTILE CHALLENGE #3 available at:
<https://textileandfashion2030.se/events/textile-challenge-3/>

Through the MatchMaking methodology, pre-organised bilateral meetings (B2B) of 20 minutes each, will take place, with the aim of generating new collaborations.

Participation is free of charge. Official language: english

To subscribe: tex4im.b2match.io

If you are a:

- textile or clothing manufacturing company
- fashion brand
- technical textile producer
- company from a different sector (building, living, medical, agro-food, transports and mobility, defence, and many others) interested in introducing textile based solutions into your products
- R&D and technology provider
- business support unit or industrial growth accelerator,

The Tex4im matchmaking event is place to be to grow and expand your market opportunities!

Smart Textiles by Science Park Borås, host the Event together with RISE, European Enterprise Network and TEK0.

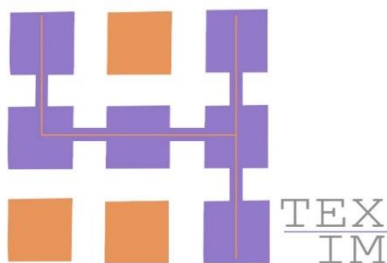

Co-funded by the COSME programme of the European Union

SUSTAINABILITY
BY SWEDEN
THE NATIONAL PLATFORM

Textile Clusters for Industrial Modernisation

TEX4IM matchmaking event is a unique opportunity to set up new business co-operations, innovative value chains or market intelligence thanks to the guaranteed presence of textile-clothing companies from at least 8 different textile regions of Europe.

Together we are the future

The Swedish government has established a platform for Sustainable textile and fashion. One of the activities is Textile Challenges: there companies are invited to learn and discuss the challenges of steering towards a sustainable value chain.

Each "Textile Challenge" has a theme that concerns a specific part of the value chain. The theme for #3 will be Material and Chemistry, taking place on November 13.
